Khanyunis, Gaza, Palestine

PROFESSIONAL SUMMARY

Software engineer focused on back-end systems with strong experience in PHP/Laravel and MySQL. Built and maintained RESTful APIs for web and mobile applications, designed scalable database structures, and improved performance for production systems. Familiar with Node.js ecosystems (Express.js, NestJS) and MongoDB, and currently learning Python (Flask, Django).

PROFESSIONAL EXPERIENCE

Linkmark | Software Engineer (Part-Time) May 2026 – Sep 2026

- Performed an end-to-end security audit of a NestJS/TypeScript platform with a React front-end and a background analytics worker; identified and resolved 41 vulnerabilities across critical, high, and medium severity.
- Remediated exposed credentials in Git history, JWT strategy mismatches, CSRF gaps, IDOR flaws, and missing rate limiting; rewrote repository history and rotated all affected secrets.
- Hardened data access and infrastructure through cursor-based pagination, server-side query limits, atomic counter updates, security headers, and PII pseudonymisation with TTL-based log expiry.
- Added dependency scanning to CI (npm audit, Dependabot) to block high-severity advisories before deployment.
- Deployed and maintained the application across production VPS and AWS staging environments: Nginx reverse proxy serving three subdomains with SSL, PM2 process management, and MongoDB data migration.
- Authored English technical documentation for all findings and delivered a consolidated final security report.

Lines | Software Engineer Jun 2023 – Dec 2025

- Developed and optimized scalable back-end services and Laravel applications for production environments.
- Built RESTful APIs for web and mobile clients, including secure authentication and authorization flows.
- Designed and maintained MySQL schemas; improved performance through query optimization and indexing.
- Supported backend delivery through code reviews, debugging, and cross-team coordination.

NewSolutions | Software Engineer Jun 2023 – Oct 2023

- Developed Laravel-based applications and core backend logic.
- Improved system security and optimized database queries.

Kayan | Software Engineer Mar 2023 – Jun 2023

- Debugged and enhanced backend services and API endpoints.
- Improved performance through query optimization and refactoring.

CyberX | Software Engineer Aug 2022 – Jan 2023

- Built back-end systems and REST APIs used by mobile and web teams.
- Integrated third-party packages and improved backend architecture.

TS2G | Software Engineer Jun 2022 – Aug 2022

- Developed backend modules using PHP/Laravel and integrated them into existing systems.

SELECTED PROJECTS

Ngliat | *Vehicle logistics platform* ngliat.com/en

- Implemented multi-role workflows for admins, companies, and drivers, including truck type and capacity rules.
- Built API endpoints consumed by mobile app to manage orders and status updates.

Topz | *Marketplace platform* topz.app/ar

- Developed backend services for product listings, user roles, and core marketplace flows.

- Delivered REST APIs used by web and mobile clients.

Egabh | *EdTech Platform*

egabh.com

- Built APIs for question posting, teacher offers, and answer delivery workflows.
- Implemented course catalog and enrollment flows for teachers and learners.

Mrkba | *Recurring trip booking*

mrkba.com/ar

- Designed booking workflows for fixed schedules across the month.
- Supported multi-entity models and integrated Vue.js dashboards.

L3bna | *Sports facility booking*

l3bna.com/ar

- Acted as technical lead for backend delivery and collaborated on Vue.js integration.

EDUCATION & INTERNSHIP

Bachelor of IT, Islamic University of Gaza

2017 – 2021

- Focus: software development, database design, APIs, and backend systems.

Unihub | PHP Developer Intern

Apr 2021 – Aug 2021

- Hands-on development in PHP and MySQL.

CERTIFICATIONS

Software Engineering Essentials - IBM/Coursera (Nov 2025) | [Link](#)

Git and GitHub - IBM/Coursera (Nov 2025) | [Link](#)

Linux Commands and Shell Scripting - IBM/Coursera (Dec 2025) | [Link](#)

Python for Data Science, AI Development - IBM/Coursera (Jan 2026) | [Link](#)

Laravel Course - Training (2021): Advanced concepts and performance tuning

CORE SKILLS

Backend: PHP, Laravel, REST APIs, Node.js (Express.js, NestJS), Python (Flask, Django - Learning)

Database/Frontend: MySQL (Optimization), MongoDB, Vue.js, JavaScript, jQuery, HTML, CSS

Tools/OS: Git, Docker, Jira, Linux, Shell Scripting

Languages: Arabic (Native), English (Professional)
